

Uninstalling

If you wish to remove Restcomm jSS7 you can do so by deleting the installation directory. If you installed it as a JBoss Service then you must remember to clean up the SS7 Service files within the JBoss directory by undeploying the service as shown below. The procedure below can be ignored if you installed the Stack as a standalone component.

*Procedure: Uninstalling Restcomm SS7 Service from JBoss 5.1.0.GA*

Undeploy:

```
[usr1]$ cd {path}/ss7-jboss  
[usr1]$ ant undeploy
```

Result:

```
Buildfile: ../{path}/ss7-jboss/build.xml
```

```
undeploy:
```

```
  [delete] Deleting directory JBOSS_HOME/server/default/deploy/restcomm-ss7-service  
  [delete] Deleting: JBOSS_HOME/server/default/deploy/jss7-management-console.war  
  [delete] Deleting: JBOSS_HOME/server/default/deploy/jolokia.war  
  [delete] Deleting: JBOSS_HOME/bin/ss7-cli.sh  
  [delete] Deleting: JBOSS_HOME/bin/ss7-cli.bat
```

```
BUILD SUCCESSFUL
```

```
Total time: 0 seconds
```

*Procedure: Uninstalling Restcomm SS7 Service from WildFly 10.1.0.Final*

Undeploy:

```
[usr1]$ cd {path}/ss7-wildfly  
[usr1]$ ant undeploy
```

Result:

Buildfile: ../{path}/ss7-wildfly/build.xml

undeploy:

```
[delete] Deleting directory JBOSS_HOME/modules/system/layers/base/org/mobicents/ss7
[delete] Deleting: JBOSS_HOME/standalone/deployments/jss7-management-console.war
[delete] Deleting: JBOSS_HOME/standalone/deployments/jolokia.war
